

FOR IMMEDIATE RELEASE

Launch My IT Biz Opens Its Doors to Aspiring Tech Entrepreneurs

Founding Member Deal Available Through August 31, 2025

Space Coast, Florida — August 1, 2025 — A bold new platform designed to help everyday people launch and grow their own IT business is officially live. **Launch My IT Biz**, founded by entrepreneur **Joseph Fleck**, is now accepting new members — and offering a limited-time Founding Member Deal through the end of August.

Created for aspiring tech professionals who struggle with the *business* side of starting an IT service company, Launch My IT Biz delivers step-by-step courses, business tools, and an engaged support community — all in one place.

“I learned a lot from building my own IT small business,” says **Joseph Fleck**, Founder and President. “I wanted to share what I learned with others who may be having a difficult time with the business side of it.”

What sets Launch My IT Biz apart is its mix of self-paced learning and real-world coaching. Members receive guidance from three AI-powered coaches:

- **Toni**, who walks users through setting up their business
- **Gary**, who teaches how to launch and attract clients
- **Brett**, who helps members grow and scale over time

The platform includes resources on:

- Registering a business, creating websites, and managing finances
- Client acquisition, workflow automation, and legal best practices
- Building a personal brand, setting goals, and scaling strategically

Early adopters can lock in the **Founding Member Deal** — just **\$29/month or \$297/year for life** — before the price increases in September.

About Launch My IT Biz

Launch My IT Biz is an online membership platform helping everyday people launch, grow, and scale their own IT businesses with confidence. Founded in 2025, the site combines practical tools, expert-backed lessons, and coaching to bridge the gap between technical skills and business success.

 Visit LaunchMyITBiz.com to join the movement.
